Note: Through diverse subjects centered around Body/Mind (self portrait, the bare body, a mutant, sex, race and gender, remembrance of an ancestor); and the creative gesture (still life, wrapping, the unknown, portrait of an artist, dream), this class will focus on restructuring our experience across the fields of visual and performing arts, including painting, sculpture, design, installation and performance. We will be committed to explore photography as Conceptual or Experiential Art and not as a documentary practice. For more details visit ced.berkeley.edu .									
04174	P 198	001 GRP	Th 6–9P	112 WURSTER	Special Group Study	3: PF	BOURDIER, J P	NONE	UG JR, SR & BY CATEGORY
Note: "Heart–Mind, Meditation and Spiritual Paths" – Each week we will meditate with fourteen enlightened leaders from many different spiritual traditions. All speakers who are well known published authors will address any of your questions and present their understanding of who we are, what is the nature of our mind and how meditation and other techniques may help us become intimate with ourselves, while possible changing our outlook on living. For a full description, go to ced.berkeley.edu and search for Visual Studies.

Note: "Happiness and the Good Life" – Everyone wants happiness, to have a good life, but how do we get it? Is it a matter of genes or luck or health or wealth or love or helping others, or some combination of these things, or something else? The Greek philosophers, starting with Socrates, offered challenging answers to these questions, which I propose to study in this course.

Control Number	Course Number	Section	Day–Hour	Room	Course Title	Unit Credit	Instructor	Exam Group	Restrictions
26203	P 3S	001 SLF			UNSCHED 200A SUTARDJA DAI Introduction to Symbolic Programming (Self–Paced)	2	GARCIA, D D	1	UG
Note: Computer Science 3S is cancelled and has been replaced by Computer Science 10. Only students who have taken 2–3 units of the course already (or who need to replace a particularly weak grade from previous enrollment in the course) will be able to enroll in 3S this semester. They should place themselves on the wait list.									
26206	P 9A	001 SLF			UNSCHED 200A SUTARDJA DAI Matlab for Programmers	1: PF	GARCIA, D D	1	
Note: Computer Science 9A is a "computing service" course. A maximum of 5 units of credit may be earned toward graduation for courses categorized as Computer Science Service Courses. Students may enroll for additional units in such courses, but these units will be recognized only for the purpose of computing workload units on the study list. See the General Catalog for more information. Orientation meetings will be held during the first week of class. See the website at inst.eecs.berkeley.edu/~selfpace for more details.

			Note: SATISFIES READING AND COMPOSITION REQUIREMENT; This course will focus on intersections between German literature and visual culture. We will read a variety of texts that thematize, exhibit, or even resist elements of popular visual culture of the last 150 years. The roles of vision and visualization will help to frame the readings and our ability to write about both written and visual texts. Also: FELDMAN, K S					
37263	P R5A	002 LEC	MWF 4–5P 228 DWINELLE	Reading and Composition	4	HAUBENREICH, J A	NONE	CURRENTLY FULL
			Note: SATISFIES READING AND COMPOSITION REQUIREMENT; In this course, we will explore texts of different media; literature, philosophy, visual arts, film, and video games, that play with the boundaries of reality. We will explore theoretical frameworks that propose that art, and culture itself, emerge out of the phenomenon of play. And finally, we will pursue written exercises with an understanding of writing as a process that expands reality and alters the world we live in. Also: FELDMAN, K S					
37266	P R5A	003 LEC	MWF 3–4P 206 DWINELLE	Reading and Composition	4	ST. CLAIR, M	NONE	
			Note: SATISFIES READING AND COMPOSITION REQUIREMENT; The Federal Republic of Germany of the twenty-first century is vastly different from that of Imperial Germany at the end of the nineteenth century. For example, during the twentieth century Germany lost about one-third of its territory. During the same century, Germany became increasingly less agriculture, more industrial, and eventually high-tech. The ethnic composition of Germany has also changed radically during the twentieth century, and instead of purely linguistic polarization, ethnic division now involves differences in religion. 			Note: SATISFIES READING AND COMPOSITION REQUIREMENT; This course will explore the different ways which cultural works of art have responded to the emergence of genetic sciences in the 20th century. We will discuss a selection of different texts, films, novels, paintings, essays, engaging with issues of cloning, bioengineering, assisted reproductive technologies, etc. We will consider how these texts convey current anxieties and promises evoked by genetic sciences, and how scientific and artistic discourses are intertwined in their attempt to make sense of human life. 			Note: SATISFIES READING AND COMPOSITION REQUIREMENT; "The Sigurd/Siegfried Cycle" – Sigurd (or Siegfried) is the quintessential Germanic hero: he is a mighty warrior king, dragon-slayer, and possessor of unfathomable riches and countless maidens' hearts. We will examine Sigurd/Siegfried, as presented in various genres of literature, film, visual arts, and music. We will consider how genre and medium are employed by an author to appeal to his intended audience, how the Sigurd/Siegfried cycle developed over time from kernels of historical fact, and how the cycle relates to other Germanic heroic cycles. Also: FELDMAN, K S

			Note: SATISFIES READING AND COMPOSITION REQUIREMENT; There may only be six or seven plots in all of literature, but there are endless ways of telling a story. We will consider a broad sample of texts from antiquity, the middle ages, and the modern era from a narratological perspective, and seek to understand what makes each authorial voice distinctive. Note: "Mendele the Bookseller" is the authorial persona of the first modern Yiddish writer, S. A. Abramovitsh, revered as the "grandfather of Yiddish literature" for his innovations in laying a new literary framework for Yiddish. Writing in the 19th Century Russian Pale of Settlement, Abramovitsh presents Jewish communities and culture with keen insight that often shades into biting satire. Requirement: one year of Yiddish or equivalent knowledge.

Note: "International Reporting in the Digital Age" – This course will offer students the opportunity to evaluate and explore different forms of media used to report on world affairs. In addition to tracking and analyzing the news gathering and reporting techniques of mainstream and alternative media sources, students will post their own engaging web content to advance the conversation on issues with international reach. Students will experiment with a variety of web-based tools and ultimately launch a multimedia, multi-page website devoted to an international topic. This course requires each student to have access to a video camera and digital camera.

Note: "Mathematics and Statistics for the Biomedical Sciences" – This is a new first-year math curriculum for biology majors at UC Berkeley. It is divided into two single semester courses to be taken in sequence. The first semester will emphasize examples related to disease progression where mathematical modeling and statistical analysis of tumor growth are key issues. Calculus will be integrated with probability theory and statistics throughout the course.

Note: "Evolution: Creatures, not Creation" – As will be presented in the assigned reading and discussed in this course, the advent of molecular biology, recombinant DNA methodology, and the capacity to obtain the complete nucleotide sequence of any genome (from a bacterium to a human) has confirmed the close relationships among all organisms at the genetic and biochemical level, and has confirmed the major tenets of the theory of evolution that were based on the fossil record and other more circumstantial and empirical evidence based on field observations of populations. Students should enroll under the letter grade option.

Note: "Matter, Mind, Consciousness" – Everything we know comes to us via our mental experience: our thoughts, feelings, perceptions, and conscious awareness. However, it is a deep mystery as to how physical processes involving the molecules and cells of our brain and body give rise to subjective experiences like thoughts and feelings. Some argue that the investigation of this mind-body problem is the most interesting and profound question in all of science. We will consider this question from multiple perspectives. Students interested in all areas of the sciences, arts, and humanities are encouraged to enroll.

Note: "Leadership, Dialog and Actualization" – This class is for leaders who want to combine inner work with increased sensitivity to ideas, feelings and concerns of others to actualize visions for their organizations within changing situations. Several types of dialog will be introduced and practiced. Each leader will go through the Vision Actualization Process that articulates a vision for a healthy community, to better connect one's inner resources with external circumstances. Interactive exercises will be used to explore methodologies for social action, community partnerships, project management. To obtain a Class Entry Code go to tinyurl.com/PACS119

Note: "Human Rights and Advocacy in the United States: Critical Service Learning" – This course introduces students to the field of Human Rights action and advocacy in the United States. Students are familiarized with global Human Rights institutions, movements and practice, and apply this knowledge locally through service/advocacy projects and the study of domestic social justice issues through a human rights frame. Students work on team–based projects in local neighborhoods that blend service, advocacy, action research and popular education, then develop their own Human Rights Service projects, which may be funded through a grant competition.

Note: "Navigating Cultures: Living and Working Around the Globe in the 21st Century" – Today's game is global and the rules are cultural. Those who understand and act effectively across cultures are poised to be more successful. This class provides the knowledge to be more effective globally. We study how culture shapes perceptions, defines relationships and influences outcomes. The International Teaching Team will focus on the BRIC countries, the United States and other cultures.

			Note: This course examines the emergence of the Chicago School in the methodological debates of late 19th century Central and Western Europe. It invites students to explore the migration of Chicago's unique approach to economics across the Atlantic before settling in at Chicago at the beginning of the 20th century. Students follow the growth and elaboration of neoliberal economics and post–democratic politics, reading the works of economists such as Frank Knight, Jacob Viner, Friedrich von Hayet, Milton Friedman, Gary Becker, and Robert Lucas; and the works of political theorists Leo Strauss, Hannah Arendt, Harold Bloom and Francis Fukuyama.
