					Note: Lucretius, On the Nature of the Universe is a masterpiece of Latin poetry, a passionate attempt at dispelling humanity's fear of death and the gods, and a detailed exposition of Epicurean philosophy. This course offers the opportunity to explore a wide range of topics: the cosmos, religion, astronomy, and natural world, the rise of western civilization, the mind and sensation, and even love. We will explore Lucretius' universal narrative, as well as the way in which the poet attempts to represent his poem as 'the universe itself'.

37903	P 101	001 LEC	MTWTF 1–2P	233 DWINELLE	Elementary Yiddish	5	COHEN, M	12	
Note: This is an introduction to Yiddish language, literature, and culture. With particular focus on the basics of Yiddish grammar, we will develop reading, writing, speaking, and comprehension skills. In so doing, we will also have an opportunity to explore simple Yiddish songs, stories, and dialogues as reflections of Yiddish culture and history. Also: CHAVER, Y									
37906	P 103	001 LEC	TuTh 11–1230P	123 DWINELLE	Readings in Yiddish	3	CHAVAR, Y	NONE	
Note: "Introduction to Soviet Yiddish Literature" – We will become acquainted with the work of avant–garde modernist Soviet Yiddish writers, such as the poets Peretz Markish and Itzik Fefer and the prose artists David Bergelson and Der Nister, marking 60 years since the execution of major Soviet Jewish intellectuals ("Night of the Murdered Poets"). Readings are in Yiddish, secondary material is in English. Prerequisite: one year of Yiddish or equivalent knowledge.

Note: "Mobile Applications and Entrepreneurship" – The more than 3 billion mobile phone subscribers worldwide far outnumber PC users; however, there have been very few successful third-party applications. In this course, you'll learn why developers have yet to realize the full potential of the mobile application market. You'll learn, first hand, the technological and marketing challenges that make mobile applications difficult to commercialize and how to overcome them. This course will be held at 2150 Shattuck Avenue, Chase Building, Skydeck Penthouse. Also: SIDHU, I

Note: Security risks are the uncertain effects of malicious activities (including sabotage, espionage, war, insurgency, and terrorism). Students will learn how to manage security risks from their root causes. For instance, students will learn not only how to defend against political violence but also how to co-opt political spoilers. Students will learn how to control risks like political instability, maritime piracy, and improvised explosives. Students will learn from lectures and practical exercises in class, a turn-based simulation, and written responses to topical risk assessment and management challenges.

Note: "The World Since 1945" – This course charts the origins of the present through some of the worlds dramatic upheavals since 1945. Themes include the Cold War; the end of empires; nation-building; economic development and dependency; the fall of the Soviet Union; and globalization. Were the triumphs of capitalism and democracy inevitable? How has the relationship changed between governments and markets, and how have supranational agencies undercut the nation-state? To what extent has "decolonization" liberated large parts of the world? What are the costs of economic growth? How did the United States gain hegemony and how have others challenged it?

Note: "Online Research and Web Production in International and Area Studies" – This course is for students interested in researching and tracking international topics of their choosing with aim to launch multimedia websites/blogs. Students will learn how to write for the web, while experimenting with a variety of web-based tools and photo/video editing programs. We will also study and discuss the contemporary social, cultural and media phenomena that are quickly changing the processes of research and news production, along with habits of consumption in an increasingly connected, online world. No prior media or web experience necessary.

Note: "Sex, Drugs, and Alcohol: A History of the Worldwide Trade in Vice" – Despite efforts to regulate or outright ban their use, sex, drugs, and alcohol have hardly waned in popularity. This senior seminar seeks to unravel that paradox. We will examine the forces behind the international trade in sex, drugs, and alcohol, their consequences, and the controversies surrounding them. Who stands to profit from this trade? What groups have problematized it, and who do they blame for it and why? When, how, and why have states and supranational agencies tried to combat it? What is the relationship between power and the body in the modern world?

Note: "Calculus, Probability, and Statistics and Discrete Mathematics" – This is a new first-year math curriculum for biology majors at UC Berkeley. It is divided into two single semester courses to be taken in sequence. The first semester will emphasize examples related to disease progression where mathematical modeling and statistical analysis of tumor growth are key issues. Calculus will be integrated with probability theory and statistics throughout the course.

Note: "Documentary Forms" – Taught by award–winning documentary filmmakers, this course explores sub–genres of the documentary form: cinema–verite, auto/biographical, polemical/propagandist, quasi–narrative and investigative, as examples of two primary strains of documentary: those aimed at producing social or political change and those inviting audiences to experience the world in new ways. In addition to theoretical work students will be exposed to practical aspects of filmmaking: ultimately producing their own short films or thinking through the process in a reasearch paper. Accomplished documentarians will visit the class to screen and discuss their work. Also: DUANE, K

Note: "The Role of History in Biology" – Development is the process by which we progress from egg to adult. Mechanisms of development have been elucidated using organisms such as the fruitfly, but understanding the differences among animals requires that we appreciate how development changes in evolution. In this seminar, we will explore these ideas. Instructor approval required. Interested students should email a paragraph or two describing their background and interests to weisblat@berkeley.edu . Please use "MCB84" as the subject. A list of admitted students and students on the wait list will be posted at the start of classes.

Note: "Evolution: Creatures, not Creation" – Molecular biology and recombinant DNA technology permit us to sequence the genomes of diverse organisms, from bacteria to humans. Genome sequences confirm that all organisms are related at the genetic and biochemical level in the ways predicted by Darwin's theory of evolution, which was based, at the time, on only the fossil record and field observations of extant populations. This course will discuss this knowledge and other cumulative evidence that now firmly establishes the Law of Evolution.

Note: "Matter, Mind, Consciousness" – All we know comes to us via our mental experience: our thoughts, feelings, perceptions, and conscious awareness. However, it is a deep mystery how the physical processes of our brain and body give rise to the subjective experience of consciousness. Some argue that the investigation of this mind-body problem is the most profound question in all of science. Students interested in all areas of the sciences, arts, and humanities are encouraged to enroll.

			Note: "Leadership, Dialog and Actualization" – This class is for leaders who want to combine inner work with increased sensitivity to ideas, feelings and concerns of others to actualize visions for their organizations within changing situations. Several types of dialog will be introduced and practiced. Each leader will go through the Vision Actualization Process that articulates a vision for a healthy community, to better connect one's inner resources with external circumstances. Interactive exercises will be used to explore methodologies for social action, community partnerships, project management. To obtain a Class Entry Code go to tinyurl.com/PACS119

			Note: "Human Rights and Advocacy in the United States: Critical Service Learning" – This course introduces students to the field of Human Rights action and advocacy in the United States. Students are familiarized with global Human Rights institutions, movements and practice, and apply this knowledge locally through service/advocacy projects and the study of domestic social justice issues through a human rights frame. Students work on team–based projects in local neighborhoods that blend service, advocacy, action research and popular education, then develop their own Human Rights Service projects, which may be funded through a grant competition.

			Note: "Navigating Cultures" – This course introduces the concepts of intercultural communication as a basis to explore how culture shapes perception, defines relationships and influences communication in business, diplomacy, politics and everyday life. Students identify their own cultural compass and learn to understand other cultural values and behaviors in a non–judgmental manner. This interactive class features case studies, simulations, thought provoking guest lecturers, film clips and lively discussions. Open to Juniors, Seniors and Graduate Students. 71203	P 24	001	SEM	Tu 4–5P	205 WHEELER	Freshman Seminar	1: PF	KARRAS, A L	NONE FR

Note: This seminar will require students to engage with current events, international and domestic, through the lens of political economy. Those who are enrolled will be required to read The New York Times and/or the Economist each week, identify issues of political economy that are being discussed, and present them to their peers for discussion. Differing perspectives on the news, as well as the different ways in which political economy theorists would interact with the events, will be discussed. Students should expect vigorous engagement and critical thinking.

Note: "20th Century Europe: Decline or Renewal?" – At the onset of the 20th century, Europe was the worlds most prosperous continent, spreading its influence, for better or worse, around the globe. Two world wars then battered the continent and left its influence in doubt. Global supremacy moved elsewhere, particularly to the United States and the Soviet Union. Through the European community, the region regained its position of international economic leadership, but its existence has never been secure. This course traces Europes checkered 20th century and the challenges to its geopolitical status and to forging a European identity.

Note: "Culture, Population, and the Paradox of Choice" – Many of our most private actions follow highly regular social patterns. No one commits suicide because fewer people than average have done so in this calendar year; no one has an unwanted pregnancy in order to offset the thwarted intentions of the infertile. And yet, rates of suicide remain flat, and observed births match the desired number of births almost exactly. How and why does this happen? In this course, we will work through cultural and demographic approaches to this question, reading a mix of classic and contemporary works.
