Note: Meets November 9, 17, 23 and 30, 2015. "Producing the World. Travels, Encounters, the Clash of Cultures" - The course will be taught by Beatriz Sarlo and will examine the discourse on travel as a way to account for different symbolic, political, social, and ethnic experiences. Also offered as a 2 unit course with Sarlo and Masiello (CCN 17395).

Note: Meets October 19-December 30, 2015. "Producing the World. Travels, Encounters, the Clash of Cultures" - The course will be taught by Beatriz Sarlo and Francine Masiello and will examine the discourse on travel as a way to account for different symbolic, political, social, and ethnic experiences. Also offered as 1 unit course exclusively with Beatriz Sarlo (CCN 17392).

				Note: "Berkeley Method: Management of Technology Innovation" - A foundational course for graduate students interested in the MTI program. This course prepares students for technology-based innovation and entrepreneurship. Students develop judgement though rigorous case study of innovation and business situations. Topics include opportunity recognition, ecosystem development, strategies for effective R&D, product management, market selection, direct and indirect sales, and funding models. The course also covers entrepreneurial and innovation mindset, risk, and leadership styles. nbsp;

59753	P 290	A01 SEM			Graduate Seminar	1	ZONCU, R	NONE	GR & BY CATEGORY
					Note: "Molecular mechanisms of nutrient sensing and signaling" - From bacteria to humans, the ability to sense nutrients is central to the correct execution of essential cellular functions, including growth and division, motility, differentiation, and turnover. Thus, during evolution, numerous nutrient sensing pathways have appeared, each characterized by great sophistication and a unique combination of mass action, allosteric regulation, and covalent modifications. We will survey the main sensing pathways for important classes of nutrients such as lipids, sugars, and amino acids, and we will identify common biochemical principles underlying their function. bsp				
59762	P 290	B01 SEM			Graduate Seminar	1	HE, L	NONE	GR ; CURRENTLY FULL
					Note: "The functional importance of the non-coding genome" - One of the big surprises of the post-genome era is that the number of protein coding genes does not scale up with the genome complexity. In the vast non-coding genome, there are diverse classes of non-coding RNAs whose functional importance has started to be revealed. We will review classic literatures and the most recent publications that reveal the importance of those non-coding RNAs in development and disease and elucidate the unique molecular basis that regulate non-coding RNA fuctions. bsp				
59765	P 290	B02 SEM			Graduate Seminar	1	RAPE, M P	NONE	GR ; CURRENTLY FULL
					Note: "Modeling human disease development and therapy" - This class will discuss recent developments that allow the generation of human disease models using reprogramming of patient-derived cells or genome editing. We will discuss both the advantages and limitations of in vitro disease models, and we will investigate how they can be or have been implemented in identifying potential drug targets or therapeutic agents. bsp				
59768	P 290	C01 SEM			Graduate Seminar	1	GARCIA, H G	NONE	GR ; CURRENTLY FULL
					Note: "Physical Biology of Living Organisms" - Biological results are increasingly couched in the language of quantitative data. In this course, we will focus on responding to such data with quantitative models. Through several classic examples, we will use simple physical principles to derive quantitative models which make polarizing predications. These predictions will then be tested by analyzing data using tools such as image analysis and bioinformatics. No previous experience with quantitative modeling or programming is necessary. bsp				
59771	P 290	C02 SEM			Graduate Seminar	1	MILLER, C T	NONE	GR
					Note: "The genomic basis of adaptation" - Next-generation sequencing has provided an unprecedented opportunity to understand how populations of organisms adapt to a changing environment. This class will survey recent papers on the genomic basis of adaptation, ranging from bacteria, yeast, butterflies, cichlid and stickleback fish, Darwin's finches, polar bears, mice, and humans. bsp				
59777	P 290	E01 SEM			Graduate Seminar	1	LAMMEL, S	NONE	GR
					Note: "Decoding neural circuit function in the mammalian brain" - Understanding the principles of information processing in neural circuits requires systematic characterization of the participating cell types and their connections, and the ability to measure and perturb their activity. The development of optogenetics has provided a wholly new perspective on brain function and the causes of disease at the circuit level. In this class we review recent progress in the analysis of neural circuits and discuss directions for future research and development. bsp

87761	P 212A	001 LEC	TuTh 11-1230P	332 EVANS	Topics in Theoretical Statistics Note: Survey of the theory and methods of selective inference. As large, open-access data sets play an increasingly central role in driving scientific discovery, the scientific method must evolve to support credible open-ended exploration. To meet this challenge, statisticians must develop methods for rigorously answering questions suggested by the data. The problem of selectivity manifests itself in diverse ways, and this course will reflect a corresponding diversity of solutions. Topics covered include: classical multiple testing, false discovery rate and false coverage-statement rate control, empirical Bayes methods, and inference after model selection. nbsp;nbsp;	3	FITHIAN, W	NONE
