Note: "Science and Public Policy" – (undergraduate level of, and taught concurrently with, Public Policy 290 section 1). This course investigates the relationship between science and public policy in the United States. How is public policy influenced by science (and scientists?). The course examines the science/policy relationship from three distinct disciplinary perspectives: economics, law, and comparative politics. Also: MAURER, S M								
77127	P 190	002 LEC	TuTh 11-1230P	150 GSPP	Special Topics in Public Policy	3	GLASER, J C	13
Note: "Prejudice and Discrimination: Psychological Bases and Policy Implications" – Much of social psychological theory and research over the past century has been concerned with intergroup biases (stereotypes and prejudice) and how they lead to discrimination and violence. This course will draw upon the rich psychological literature to explore the origins and operation of such biases. Special emphasis will also be given to the psychological legacy of these biases for its targets, as well as the implications of this literature for anti-discrimination policy.
