We will explore these issues through primary and secondary texts from antiquity (writ large) that focus on the mundane and the spectacular moment of violence in areas where large numbers of different and argumentative people chose to make homes. Readings range from inscriptions and papyri to poetry and historiography, from classical Athens to the Church Fathers, martyr texts, and late antique literature.

<b>Note:</b> "Matter, Mind, Consciousness" – Everything we know comes to us via our mental experience: our thoughts, feelings, perceptions, and conscious awareness. However, it is a deep mystery as to how physical processes involving the molecules and cells of our brain and body give rise to subjective experiences like thoughts and feelings. Some argue that the investigation of this mind–body problem is the most interesting and profound question in all of science. We will consider this question from multiple perspectives. Students interested in all areas of the sciences, arts, and humanities are encouraged to enroll.

					<b>Note:</b> "Psychology of Religion" - This course will introduce you to the fascinating world of psychology of religion, a sub-field within social psychology. We will focus on five central questions: Why do people believe in God(s)? What exactly do people (children, adults, mystics) mean when they think of God? How does religiosity play out in communities and institutions? What are some of the outcomes of being religious; does it affect kindness, intolerance and health? And finally: how might therapy for religious individuals differ from therapy for the general population?
