Note: "Introduction to the Archaeology of the Roman World" - This course provides undergraduate students with an introduction to the archaeology of the ancient Romans from Rome's origins in the Iron Age down to the disintegration of the Roman empire in the 6th century A.D. It aims to familiarize students with the more significant sites, monuments, artifact classes and works of art relating to the Roman world, and to introduce students to the important research questions in Roman archaeology, providing them with an appreciation of the methods that archaeologists employ to address these.

Note: "The Archaeology of Houses and Households in the Roman World" - This course provides an in-depth introduction into the archaeology of Roman domestic structures and the groupings of people who inhabited them. The chronological sweep extends from the Iron Age to the late imperial period. While the course focuses on the Italian evidence, it also considers houses and households in a sampling of the regions that made up the Roman empire. Attention is given to recent theoretical and methodological developments in the archaeology of houses and households, with the critical reading of the relevant scholarship.

SEE DEPT 27206	P 199	001 IND			Note: "California Water" - Northern California has a relative abundance of water while the most productive agriculture and largest cities are located in the south. For six decades, California has debated how to best move water from North to South while balancing water reliability for users with protecting the environment, economy, and culture of the Sacramento - San Joaquin Delta. This course covers the history of California water development and environmental transformation and focuses on the science, economics, and politics underlying the current decision with respect to the construction of a peripheral tunnel around the Delta. Note: This course was approved by COCI to be changed to new title: "Climate and Energy Policy" - This intermediate-level course engages with both the politics and the design of climate and energy policy, with a focus on the United States. Key themes include political strategies to climate change, the choice of policy instruments, the role of various state actors and interest groups in policymaking, the interaction of policy and low-carbon technology markets, and the U.S. and global politics. The course combines the study of analytical concepts with in-depth case studies.

				Note: "Gdansk/Danzig/Gedanum: A City Shaped - Histories and Cultures" - In this course we will examine the fascinating, competing histories and cultures of the Baltic coast city known variously as Danzig and Gdansk (among other spellings and forms). First a medieval Slavic (Polish/Kashubian) fishing village, then a growing port city under the rule of the Teutonic Knights of the Cross (14th century), then the largest city of the Polish-Lithuanian Commonwealth (15th century to 1795).

Students are expected to join a team, pick a real world problem in finance and solve it (as a real startup team would). Teams will operate like a startup company, and are expected to execute through the lifecycle of a real company. The final will include a presentation to a board of directors that includes an investment committee. The winning team will be awarded seed funding. Through a competition-based format, students will work in simulated cross-discipline, lean start-up teams vying to create innovative products to further a social cause. Teams will navigate weekly realistic challenges and have frequent interaction with the sponsor and mentors. The final outcome will be a working prototype and "white paper". <p>Note: "East Bay Parks: A Spring Almanac" - This course meets for six Fridays (January 23, February 27, March 13, April 3 & 17, May 1, 2015). For the first class meeting, meet at VLSB near the T-Rex. In this seminar, we will make repeated visits to nearby parks in the hills above campus to track the coming of spring. We will discuss how personal observations and time spent in nature inform scientific research and approaches to conservation of open space and biodiversity. We will also learn to identify some of the common native plants in the area and observe their phenology as spring unfolds. Students should be prepared to walk 1 - 2 miles on field trips.&nbsp;M 2-3P 5192 VALLEY LSB Freshman Seminars 1 CALDWELL, R L TBA FR & BY CATEGORY</p>

Students will attempt to replicate experiments that suggest that humans are able to navigate using geomagnetic fields. Note: "Research, Analysis and Writing in International Studies" - This course is a practical introduction to the social scientific skills required to complete a project of research or analysis, a guide to the whole process from scoping your topic to writing a report or dissertation. This is not a course on particular methods, such as statistical methods, although it explains how to make good methodological choices. This course is

46439	P 106	001 LEC	intended to be an introductory but comprehensive guide to research and analysis from start to finish, through all steps of the project, from choosing the topic to delivering the finished written product. nbsp;nbsp;nbsp;

			Note: "Market Empire and American Foreign Intervention" - The foreign policy of the United States has been shaped, since the beginning of the twentieth century, by the country's position as the preeminent defender of capitalism, which its leaders generally consider both an ethical system as well as one of political economy. But how often have its interventions worked? What were their long-term consequences? This course will look at the history of U.S. foreign interventions from a political economy perspective-not only from the point of view of U.S. policy elites, but also from the "outside in," by those who managed and resisted U.S. rule. nbsp;nbsp;

			Note: "New Approaches to Crises and Political Transition in the Middle East and North Africa" - Recent crises in the Middle East and North Africa (coups, electoral violence, revolutions and uprisings) are increasingly being addressed in innovative and complex ways. While the point of departure for each country is starkly different, the emerging norm is for complex political transitions. This course examines the mechanics of transition through a comparative approach and scrutinizes the roles of the African Union, the League of Arab Nations, and the United Nations. nbsp;nbsp;

			Note: "Intractable Conflicts: Approaches to Peace Building in Israel/Palestine" - This course provides students with the tools necessary to understand the history of the Israeli-Palestinian conflict, with an emphasis on contemporary challenges including key obstacles to resolution. Students will also examine the various attempts to mediate and negotiate a final status solution including informal initiatives by civil society groups. This course is a prerequisite for participating in the Olive Tree Initiative summer trip to Israel/Palestine. nbsp;nbsp;

			Note: "Globalizing Latin America" - This course uses globalization as a framework for understanding contemporary Latin America and the Caribbean. We will begin with a consideration of the region's colonial heritage and debates over the legacy of its colonial experiences. Topics to be covered will include development and trade policy, urbanization, migration, nationalism, popular culture, race and ethnic politics, social movements, labor activism and tourism. Coverage will be broad and the focus will be interdisciplinary, with case studies drawn from mainland Latin America and the Caribbean. No prior knowledge of the region is required. nbsp;nbsp;

			Note: "Counterterrorism and Counterinsurgency" - This course will describe the issues, policies and practices of counter-terrorism and counter-insurgency. Terrorism continues to increase in frequency and lethality. Some nominal counter-terrorist activities have stimulated insurgencies, so counter-insurgency too is more salient: insurgency now causes much more harm than terrorism. This course examines the concepts, history, motivations and methods of terrorism and insurgency and the ways in which the counter-terrorist and counter-insurgent side can counter those motivations and methods. nbsp;nbsp;

			Note: "Education and Social Change" - Education is often touted as a route out of poverty and means of increasing equity. This course interrogates that assumption. Drawing on interdisciplinary scholarship and local and global case studies, students examine competing educational theories, pedagogies and movements, and their historical and potential roles in contributing to greater social justice or to social and economic stratification. Topics include universal education, cultural imperialism, popular education, corporate sponsored education, education for development, decolonial education, international competition, and the politics of knowledge production. nbsp;nbsp;

			Note: "Commodities, Trade and Global Labor Regimes" - From silver to cocaine, sugar and tobacco, to cotton, oil and electronics, the nature of work has been shaped by expanding global demand for products whose origins - whether in the soil or the factory - remain mysterious. This course will explore the worlds of production and consumption and ask how global demand for specific commodities has shaped local, national and global politics. We will examine legal and illegal products, the cultural context in which products are made and acquire value, and the tangled relationship between production, ownership, labor discipline and human rights. nbsp;nbsp;

Note: "Resist, Occupy, Create!: Latin American Social Movements" - Social movement activity in Latin America has exploded over the last two decades. The poor have mobilized in response to neoliberal policies that have made their survival more precarious, and that have highlighted their exclusion from politics. We will examine demands for a reconceptualization of democracy, the different ways that social movements relate to governments, the internal dynamics and strategies of social movements and the various ways social movements act beyond their national borders. Along the way you will learn about social movements of Latin America today.

Note: As the saying goes, "Sticks and stones/ Can break my bones/ But words will never hurt me" - but is that really so? We all know that people do things with words and that in turn words do things to people. Language can inform or deceive, seduce or insult, make us fall in love or kill our reputation. This course will explore the workings of language as social symbolic power in everyday life. We will examine the discourse of politics and the media, children's books and advertisements, psychobabble and corporate-speak, as well as the relation between language and identity, ideology, and myth. Note: "Materials and Weapons of War through History" - For most of known history, advances in materials technology have appeared primarily in two areas: objects of art and weapons of war. The former build civilization. The latter have often set its course, as critical military engagements from Kadesh to Kosovo have most often been dominated by the forces with the superior technology. In this seminar, we shall use the development of weapons through history as a vehicle to understand the important properties of different types and classes of materials, and trace their technological development and technical significance across the millennia.

Note: "Current events in the Middle East" - This seminar will ask students to engage with Middle Eastern political, cultural and environmental issues as presented in the media. Those who are enrolled will be required to read The New York Times each week and identify current Middle East related news to present to their peers for discussion. Differing perspectives on the news, especially academic approaches to and understandings of specific events, will be of particular interest. Students should expect vigorous engagement and critical thinking.

Note: "New Approaches to Crises and Political Transition in the Middle East and North Africa" - Recent crises in the Middle East and North Africa (coups, electoral violence, revolutions and uprisings) are increasingly being addressed in innovative and complex ways. While the point of departure for each country is starkly different, the emerging norm is for complex political transitions. This course examines the mechanics of transition through a comparative approach and scrutinizes the roles of the African Union, the League of Arab Nations, and the United Nations.

Note: "Intractable Conflicts: Approaches to Peace Building in Israel/Palestine" - This course provides students with the tools necessary to understand the history of the Israeli-Palestinian conflict, with an emphasis on contemporary challenges including key obstacles to resolution. Students will also examine the various attempts to mediate and negotiate a final status solution including informal initiatives by civil society groups. This course is a prerequisite for participating in the Olive Tree Initiative summer trip to Israel/Palestine.

Note: "Political Economy of the Middle East" - The Middle East, known for perpetual wars, authoritarian regimes, impoverished millions, unemployed youth, and oil reserves, is a mix of very rich and poor countries with varying levels of urbanization, most sharing a colonized past, short-lived democracy, military coups, revolutions, and dictatorships. War and oil are two of the forces that have shaped the region's development since the Second World War, placing it at once in the center and on the periphery of global politics. This course employs selected themes and events to understand and explain the region's many state structures and economic systems.

				Note: "Matter, Mind, Consciousness" - All we know comes to us via our mental experience: our thoughts, feelings, perceptions, and conscious awareness. However, it is a deep mystery how the physical processes of our brain and body give rise to the subjective experience of consciousness. Some argue that the investigation of this mind-body connection is the most profound question in all of science. We will address this question from the perspectives of biology, philosophy, physics, and psychology - cognitive science, broadly defined.

Note: "Addressing Inequality through Urban Debate" - This DeCal course will teach students about the benefits of urban debate (specifically the work of the Bay Area Urban Debate League) and the context in which it takes place. Students will work closely with inner-city youth to develop argumentation, critical thinking, and persuasion skills at various BAUDL events throughout the year, and learn about how urban debate and their own social location relates to privilege and race.

Note: "Post-Conflict, Peace-Building" - This course examines the process of rebuilding states and societies that have experienced civil conflicts. Having outlined the causes of civil wars, the course will provide an overview of how international peace-building missions evolved in past decades to address an increasing number of factors in the war-to-peace transition. It will then focus on the main components of state reconstruction, including economic development, social reconciliation, governance and democratic practices. The course will discuss lessons learned from case studies and from cross-national analyses and experimental project evaluations.

Note: "Religion, Peace and Conflict" - Religions, while teaching peace, love, and the "golden rule," are often used to fan the fires of conflict and war. We explore this paradox of religion and war, using core doctrines from traditional major religious sources, as well as contemporary essays on religion and conflict.

Note: "Intractable Conflicts: Approaches to Peace Building in Israel/Palestine" - This course provides students with the tools necessary to understand the history of the Israeli-Palestinian conflict, with an emphasis on contemporary challenges including key obstacles to resolution. Students will also examine the various attempts to mediate and negotiate a final status solution including informal initiatives by civil society groups. This course is a prerequisite for participating in the Olive Tree Initiative summer trip to Israel/Palestine.

Note: "Peace and Security in the Northeast Asia" - Northeast Asia, defined here as the region comprising the Korean Peninsula, Japan, China and Taiwan, has become one of the most dynamic and complex areas for peace and security issues in international politics. This course will examine the many layers of peace and security in Northeast Asia, ranging from local disputes to region-wide crises. Aside from more military and political elements, this course will also explore other aspects of peace and security that will include environmental protection, human rights, social security and public health.

Note: SATISFIES AMERICAN CULTURES REQUIREMENT; This course examines the history of progressive social movements in the San Francisco Bay Area. Combining history, urban geography, and ethnic studies, we ask: why and how did these movements emerge? What cultural, racial, ethnic and political identities were drawn from and formed in these movements? What kinds of knowledge and institutions were created by these movements? Community-engaged research projects are central to the class. Cross-listed with International and Area Studies 158AC section 1.

71203	P 24	001 SEM	Tu 2-3P	201 WHEELER	Freshman Seminar	1: PF	KARRAS, A L	TBA	BY CATEGORY
			Note: "Political Economy in Contemporary Perspective" - This seminar will require students to engage with current events, international and domestic, through the lens of political economy. Those who are enrolled will be required to read The New York Times and/or The Economist each week, identify issues of political economy that are being discussed, and present them to their peers for discussion. Differing perspectives on the news, as well as the different ways in which political economy theorists would interact with the events, will be discussed. Students should expect vigorous engagement and critical thinking. nbsp;

			Note: "Universities and Dissidents" - True freedom, according to Rosa Luxemburg, is always freedom for the "one who thinks differently." Are we liberated by our institutions of higher learning or indoctrinated by them? This course traces the role of the University in global history from its origins in medieval Europe to UC Berkeley today, both in inculcating an ideology and language of state power and also in teaching students and scholars to question received wisdom. It asks students to define the value of academic freedom and the institutional role of the university in protecting it. nbsp;

			Note: "Patterns of Regional Development in China's Reform Era" - China's economic performance has impressed the world since the 1990s. However, the country's economic development has never been homogeneous or even. Understanding regional differentiation is a crucial starting point for our understanding of China's transition as a whole. It may well also be crucial in answering the question of whether China's economic reforms are state-driven or market-driven. This seminar course explores how a variety of bottom-up economic and institutional experiments have reshaped China's different localities and driven the transition

			Note: "Political Economy of the Middle East" - The Middle East, known for perpetual wars, authoritarian regimes, impoverished millions, unemployed youth, and oil reserves, is a mix of very rich and poor countries with varying levels of urbanization, most sharing a colonized past, short-lived democracy, military coups, revolutions, and dictatorships. War and oil are two of the forces that have shaped the region's development since the Second World War, placing it at once in the center and on the periphery of global politics. This course employs selected themes and events to understand and explain the region's many state structures and economic systems. nbsp;nbsp;

			Note: "Ideologies of Social Justice in the 20th Century" - This course will use the writings of artists and intellectuals to examine the ideological foundations of the century's major political movements: from Communism, fascism, and libertarianism to feminism and anti-colonialism. How did each movement define social justice and injustice? What historical circumstances created and shaped their beliefs? And what should we learn from the bloody 20th century's debates about political economy when thinking about what we should do in the 21st? nbsp;nbsp;
